## **Modern Trends in Human Leukemia IV**

Latest Results in Clinical and Biological Research

Including Pediatric Oncology

Wilsede Joint Meeting on Pediatric Oncology I,  
Hamburg, June 20–21, 1980

Editors: R. Neth, R. C. Gallo, T. Graf, K. Mannweiler,  
K. Winkler

1981. 252 figures, 118 tables. XXV, 557 pages (Volume 26)  
ISBN 3-540-10622-7

This book contains a report on the Wilsede meeting held in Germany in June, 1980. The meeting included the Frederick Stohlman lectures on leukemia, held by G. Klein on the relative role of viral transformation and cytogenetic changes in human and mouse lymphomas, and by H. Kaplan on the biology of Hodgkin's disease. The contributions are divided into clinical cytogenetic, cell biologic, immunologic, virologic, and molecularbiologic sections. Also included is the Wilsede Joint Meeting on Pediatric Oncology I.

The book will be of value to both clinicians and researchers in many fields of oncology, as well as for investigators and students interested in human leukemia.
